

## **DIAMOND GUARANTEED BOND**

Using experience of its owner BOOLER DIAMONDS Llc, the company BOOLER INVEST LTD operating in the diamond market for over eight years has managed to combine the potential of diamond as a conservative investment product with a stable value and slower liquidity and valorisation of funds in commodity markets.

Hundred percent guaranteed investment product in the form of a bond with a guaranteed annual yield of 5% is the result.

However, it focused on long-term valorisation of funds, from 5 years and up. This means that the target group of investors are clients who want to save for old-age financial security, those who want to valorise their funds for their children or investors who invest a part of their portfolio into this bond as a long-term and still guaranteed investment.

The guarantee of this fund consists of certified diamonds in the wholesale price /RAPAPORT as at the date of the contract/, equivalent to the value of investment of each investor. Each diamond is joint to a bond and contract, and handed over to the investor for the period of bond term.

### **WHY TO INVEST INTO BOOLER INVEST LIMITED BONDS?**

Free financial assets are then valorised by professional and licensed experts in commodity markets in a risk-free manner or with an emphasis on minimizing trading risks. Thanks to this setting, we are able to guarantee our clients an annual yield of 5%.

Would you like to invest into diamonds but you are afraid? You don't understand diamonds or are you afraid of poor liquidity? Are you afraid you will suffer a loss when selling them? We will remove your apprehensions thanks to the investment into guaranteed BOOLER INVEST LIMITED diamond bonds.
